USA/ Canada Edition

Introduction

For over 30 years, Atacama and Apollo HiFi and AV supports have been designed and made in the UK by our dedicated team of craftsmen and craftswomen.

Winning numerous awards and accolades, Atacama furniture is aesthetically pleasing, functional, practical and adaptable, with the latest range of Evoque bamboo based supports bringing innovative new technologies to hifi furniture design.

Due to the very specific needs of American and Canadian audio enthusiasts, the Evoque range has been upgraded and enhanced with components and color options not usually available on standard Evoque types.

As the primary material, Atacama's high density Bamboo was chosen because of its suitability when interfacing with the supported HiFi and AV equipment. As a natural material, part of the intrinsic beauty of bamboo means each module is aesthetically unique, making your chosen rack one of a kind.

The result of this is that colour variations will be present. Do not attempt to colour match using the photography shown in this brochure. For further details about finishes, please be sure to read the "Bamboo Color Information" section on the back page.

Contents

Evoque Eco Design Edition (US SPEC) Series:-

Accessories:-

Atacama racks have spiked feet. It is strongly recommended to use Atacama HD-L spike shoes if your rack is to be placed on a delicate floor covering.

Evoque Eco 24-16 Design Edition (US SPEC)

- Design Edition US SPEC are unique hand crafted versions of the multi-award winning Evoque Eco range of hifi and AV supports, consisting of:-

Evoque Eco 24-16 Design Edition (single width)
Evoque Eco 44-16 Design Edition (double width)
- Atacama Evoque Design Edition Bamboo modules are created by our top UK Based craftsmen.
- Each complete rack is supplied as a matched set and is available as a single or double width support.
- All versions come with Satin Black Legs as standard.
- Three choices of Bamboo wood finish can be specified.
- Exclusive to the Evoque Design Edition US SPEC, Reference series mechanically tuned spikes are supplied as standard. This upgrade both increases the weight capacity by 50% over standard Evoque's, while offering a performance improvement over standard BZP spikes.

Technical Specification

ATACAMA EVOQUE 24-16 DESIGN EDITION (US SPEC)

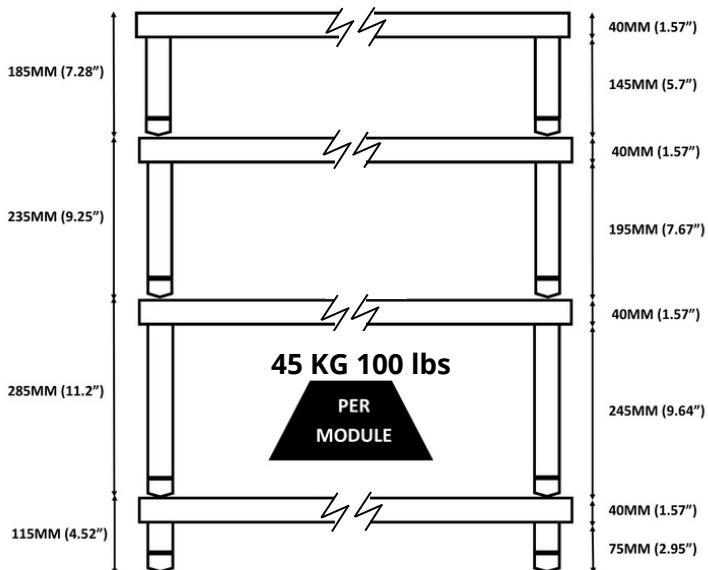

Maximum overall height not to exceed 1255MM (50")

ATACAMA EVOQUE 44-16 DESIGN EDITION (US SPEC)

LEG HEIGHT OPTIONS FOR EVOQUE 24-16 & 44-16

US SPEC only- a 300mm (11.8") internal storage height (340mm (13.4") internal) leg pack can also be specified

Technical Specification

Natural Bamboo Finish

Design Edition Bamboo Finish

Dark Bamboo Finish

Colors and bamboo grains shown in this brochure are examples of the final finishes. Due to print limitations, studio lighting and the variability of the final look of each wood shelf, to avoid disappointment do not attempt color matching using the photographs shown to existing furniture.

Natural Bamboo

Max Total Weight capacity per rack 150KG 330 lbs
Maximum height 1255mm (50")
Maximum number of stacked modules to height limit

Leg Pack Information

Leg packs are identified and listed by the INNER storage height, or in the case of the shortest leg length as a Base module. There will be some additional adjustment available via the leg spikes.

All Evoque racks should use a Base module as the lowest level of storage to avoid the legs splaying and to maximize storage weight capacity. Evoque Design edition models have leg height replacement packs available should your storage height requirement change at a later date. Design Edition (US SPEC) models have an extra tall 300mm (11.8") leg option which is an additional cost item on other Evoque types.

IMPORTANT-Bamboo Colour Information

Bamboo is a natural material so color, texture, grain and age will give a variable appearance to each shelf. Because of this, adding extra shelving at a later date will introduce a batch /color tonal difference. Where possible order your rack as a complete modular support with enough levels to fulfill possible future requirements in order to minimize this variation. There may be some darkening of the wood over time. This is normal and part of the material's maturing process. Colors and bamboo grains shown in this brochure are examples of the final finishes. Due to print limitations, studio lighting and the variability of the final look of each wood shelf, to avoid disappointment do not attempt color matching using the photographs shown to existing furniture. Each Bamboo shelf will have its own unique grain, color and tonal balance which is part of the intrinsic beauty of natural woods and should not be viewed or treated as a defect. Atacama source the Bamboo both ecologically and ethically. No major components or materials including the Bamboo are sourced from the R.O.C. so Panda friendly!
